

## Care & Maintenance

**Designed and constructed to last, a small amount of attention will maintain the quality of your furniture.**

### Outdoor

- \_ Woven Furniture
- \_ Batyline Sling
- \_ Teak
- \_ Powder Coat
- \_ Outdoor Fabrics
- \_ Standard Foam Inner
- \_ Porcelain
- \_ Natural Stone

#### Woven Furniture

We recommend woven furniture is regularly cleaned. First dusted with a dry, clean brush, then a Sling & Woven Cleaner. Use a non-foaming cleaner, foaming product will leave residue in the gaps in-between the weave and attracts dirt. A pressure hose on a low setting is acceptable to use on woven furniture, but avoid any teak components.

#### Batyline Sling

Batyline is resistant to fading & mildew, requiring cleaning with only a mild soap and water. Use a non-foaming cleaner, foaming product will leave residue in the gaps in-between the weave and attracts dirt. A pressure hose on a low setting is acceptable to use on sling furniture, but avoid any teak components.

For long term revitalization, we recommend sling furniture is cleaned using a Sling & Woven Cleaner from your product retailer.

### Teak

We recommend that you allow your teak furniture to weather naturally and simply clean thoroughly once or twice a year with a Teak Cleaner. Teak furniture is best stored in a water-tight garden shed or garage. Do not move teak furniture from outside straight into a heated indoor room. Sudden changes in temperature and humidity may cause the wood to split.

To protect teak surfaces from staining, maintain the silver-grey patina on weathered teak, protect the wood against the ingress of moisture, the adhesion of dirt and prevent mildew, we recommend using a Teak Protector.

If you wish to retain the golden-brown colour of new teak we also offer a Super Cleaner and Teak Sealer. You will be embarking on a regular maintenance programme as products will regularly need to be re-applied to provide continuous protection.

#### Powder Coat

Avoid contact with liquid, heat, bird droppings and direct sunlight. Regularly wipe metal with a damp soft cloth to remove particles which can abrade the surface with wear. Abrasive cleaning products are not recommended.

### Outdoor Fabrics

Kett Fabric Collections consist of 100% solution-dyed acrylic or olefin fibre; resist fading from the sun, water and general atmospheric agents. Vacuum cushions to remove any surface dust. Most spot stains on fabrics can be cleaned by rubbing with room temperature water and natural soap. Rinse thoroughly with clean water to remove soap. Cushions which are zip-off can be machine washed. Do not wash at greater than 30°C. Cushions should be air dried. Do not steam iron or dry with electric sets. When putting cushion covers back onto foams, do so whilst the covers are still damp.

#### Standard Foam Inner

Cushions should be brought inside over the winter months or if heavy rain is expected to ensure long life. If cushions get very wet, remove the cover and allow the foam to dry separately.

#### Porcelain

Porcelain is suitable for internal and external use. Panels are stain resistant, being a non-porous material but normal daily care must be taken to immediately clean stains. Best method to minimise stubborn stains is to immediately wash away stains such as red wine, food, oils, drinks by using warm water and a soft non-abrasive cloth. For stubborn stains use a non-abrasive cleaning product such as sugar soap.

### Natural Stone

Natural Stone is a porous material, making it susceptible to staining as it has an increased absorbency.

Natural stone includes variants such as marble and granite. It is essential that no liquids are left to sit on natural stone as they will penetrate and cause staining. Acidic liquids (orange juice, wine etc.) should be avoided as they react with stone and can deteriorate the finish. Wipe up spills immediately with a cloth and warm water. Do not place hot items directly on to surface, this may cause the stone to crack. Clean regularly with warm soapy water and a soft cloth. Do not use chemical products for cleaning stone that contain acid as they can cause permanent staining. Do not use scourers or any type of abrasive product to clean the stone.

- \_ Do not stand on table top.
- \_ Refer to lifting & moving instructions before moving stone.
- \_ Always use a coaster with drinks.
- \_ Clean spills immediately.
- \_ Always use warm water & a soft cloth when cleaning.
